

PHOTOGRAPHY & VIDEOGRAPHY SERVICES

Thank you for your interest in working with 206 Media, LLC to capture content for your hunting outfit. While most arrangements for hiring us are made to suit each outfitter's needs, the following is a general breakdown of what you can expect.

WHAT WE PROVIDE:

- Long Form Cinematic Videos
 - After capturing several successful hunts at your outfit, we can create professionally edited videos that truly reflect what hunting with you is like. The content we capture can be made into a promo style video to use as advertising for your business. We can also make vlog style videos perfect for YouTube content that show what a day in the life is like for your hunters.
- Social Media Content
 - We take our best shots and edit them into ~30 second vertical videos to trendy music that will make your social media pages look professional and eye-catching. If you have specific ideas for social media music or styles, please share them with us! We want to create content that you enjoy.
- Trophy Photos
 - Having a camera along for your hunts means your clients get to take home professional trophy photos. Hunters always appreciate it when someone is there to capture their big moment from all the best angles. This makes great promotional content for you as well.
- BTS / Action Photos
 - Along with video footage, we will capture great still photos of the hunting action. These make great social media posts and can be shared with your hunters.

COMPENSATION:

- \$300 per hunting day
- Travel costs based on mileage (from Montgomery, Texas)
- Lodging must be arranged for the camera operator
- A down payment equivalent to the first two days of service is required to book our services.

ADDITIONAL INFORMATION:

- The amount and length of content we can produce is dependent on how many days we hunt with you as well as the success of the hunt. Typically, one hunting day produces an 8-10 minute video. If the hunt is not successful, we will still capture some usable footage, and it can be incorporated into other day's videos.
- You are welcome to make specific requests for the style or scope of the video ahead of time, but this must be finalized before the editing process begins.
- Any edits to videos can be made except for major changes such as:
 - Changing the music
 - Changing the order of major scenes
 - Adding more video time longer than 2 minutes
- Please allow up to 3 months after the last hunting day to receive all final edited content. We typically turn edited photos around on the same day as the hunt, or within one week. We can prioritize certain videos or hunts to edit first. We will stay in constant communication with you on the status of your videos.
- A down payment equivalent to the first two days of service (\$600) is required to book our services. The rest of the payment will be due before the camera operator leaves camp.
 - The best method of payment must be agreed upon prior to the first hunting day. We accept direct bank deposits, paper checks, money orders, cash, Venmo, and Zelle.
 - All transactions are accepted in US Dollars only.
- Invoice: a draft invoice will be issued before booking our services reflecting the expected service day fees and travel fees. The final invoice will be issued before the camera operator leaves camp.
- Service Contract: the completion of our service contract is required to book our services.
- Refund Policy: Should you wish to cancel our services, your down payment will be refunded in full if cancelled one month prior to the first hunting day. If you wish to

cancel within the final one-month time frame, your deposit will not be refunded, but you will not be required to pay the remainder of the service fees.

- Full service fees will not be refunded for any reason once they are paid in full.
